Translate in 4 easy steps

Install & Configure
Access and configure the LILT plug-in via the Contentful Marketplace

Translate & Create
Create or translate your content that automatically aligns with your brand's voice and style

Track & Review
Monitor real-time status of your projects; review and adjust before publishing
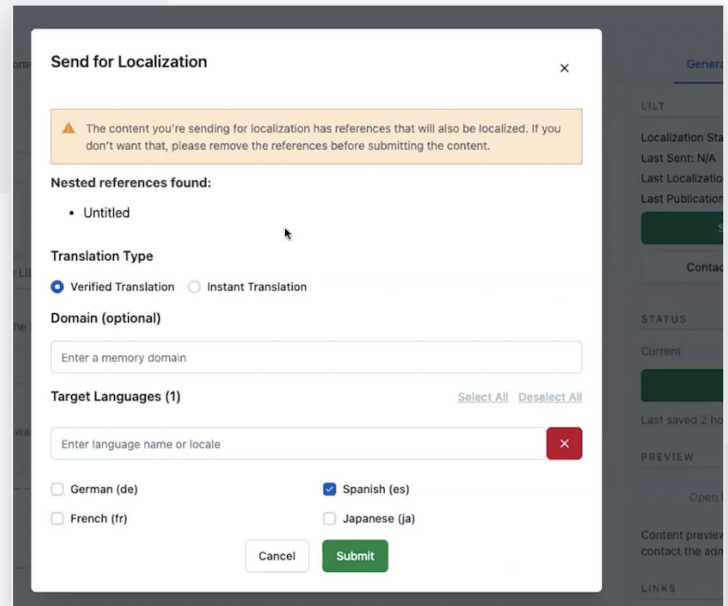

Publish & Optimize
Publish your multilingual content directly from Contentful; bulk export for enhanced scalability

NAMI
National Alliance on Mental Illness

"LILT was a good choice for NAMI's needs. With the help of its connectors, we are able to translate content quickly. It's faster, easier, and more efficient."

Connector: LILT and Contentful

Expedite Publishing Multilingual Content

Implement a seamless localization process from within your Contentful space, reducing workflow hassles and improving web copy consistency. You also get access to LILT Create, a multilingual AI-generated content tool that automatically creates on-brand, localized content in any language.

In-Context Learning and Adaptation

As human verifiers interact with predictive suggestions, LILT's Contextual AI Engine learns and updates future suggestions. Alternatively, you can utilize LILT's Instant Translate feature and receive AI-translated content within seconds directly to your Contentful space.

Ensure Brand Voice Across Your Content

Your brand guidelines will ensure messaging is adapted to each region and aligned with your brand voice and domain specific context. All of this functionality is achievable with just a few quick clicks in your Contentful web application.
