

The Leading AI Solution for Finance Translation

For unparalleled data protection, adopt the most trusted AI Solution for Financial Translation

## Keep Your Data Secure

In the highly regulated finance industry, linguistic accuracy, technical expertise, and compliance adherence are of the utmost importance. When you work with Lilt, keeping your company and customers' data secure is our highest priority.

## Lilt's AI Approach

### Contextual AI Engine

Lilt's large language models instantly retrain in real time, enabling higher accuracy, greater consistency, and alignment to the customer's brand voice.

### Connector Integrations

Content creators are empowered to publish across languages from their workflows (e.g. CMS, design, code repositories, etc.).

### Human Feedback

Skilled linguists review AI-generated translation suggestions, powering In-Context Learning with real-time feedback.

## Results

Consistent Brand Experience

**70%**

reduction in translation errors

Faster Turnaround Time

**2-3x**

than traditional LSPs

Higher Localization ROI

**50%**

reduction in cost of human translation

## Data Security at Lilt

### Data Security

All customer data is protected through vigorous security protocols

### Top Certifications

Lilt has completed all certifications needed to keep your translated data secure

### Secure Encryption

Keep your translated content private through encrypted delivery protocols

### Privacy & Security

Your data is treated with the utmost responsibility and never shared with 3rd parties

"Lilt's AI technology allows us to quickly and easily localize to any language that we need on the fly."

**Brad Cain**

Director of Marketing at Keeper Security

## Security at Lilt

## Security for Finance

### Data Protection

The Lilt Platform is designed with built-in security features, such as data encryption and secure file transfer protocols, ensuring that sensitive information remains protected during the translation process. With state-of-the-art encryption, your data is SSL-encrypted in transit, and is encrypted via AES-256 encryption in our database.

### Compliance

Lilt operates with advanced security standards for all customers, including enterprises in regulated industries and government agencies. Data security, governance, and privacy are always taken seriously, with a comprehensive data security program in place to protect all customer data from unauthorized access. Lilt has achieved SOC 2 <sup>®</sup> assessment, as well as ISO 9001 and ISO 17100 certifications.

### Confidentiality

The finance industry requires stringent confidentiality measures to be implemented for the protection of sensitive information. The Lilt team ensures that your translations are kept confidential, and never shared with outside entities. Your data will will never be mined or used by us for our own interests.
